YASHWANTH KATIKE

Software enthusiast

📞 903 2041905   @ yashwant.k.me@gmail.com   🔗 https://yashwanthk.netlify.app/   📍 Hyderabad

SUMMARY

Motivated College Student actively pursuing employment opportunities.
Showcasing a determined work ethic and a diverse range of exceptional
skills. Proficient in various social media platforms and office technology software. Devoted to leveraging my abilities to advance a
company's objectives. Demonstrating a well-rounded and professional
approach as a collaborative team member, committed to furthering
academic pursuits at the collegiate level. Possessing extensive knowledge in user interface, testing, and debugging processes.

EDUCATION

B Tech CSE

NIIT University

📅 2019 - 2023

TRAINING / COURSES

Cisco cybersecurity essential (Cisco)

Meta Front-End Developer Professional Certificate (Coursera)

EXPERIENCE

Junior Web Developer

siNUsoid

📅 2021   📍 neemrana

In house Tech fest of NIIT university
· Have designed and developed interactive web experiences including web applications, eCommerce sites, and mobile friendly websites Highly skilled in HTML, CSS, Photoshop, and Illustrator

PROJECTS

Rapid RED

📅 Date period   📍 Location

Rapid Red - Blood Donor Locator App is an innovative mobile application designed to facilitate and streamline the process of finding blood donors nearby during critical and urgent situations. This app leverages modern technology and a user-friendly interface to connect those in need of blood with potential donors in their vicinity, ensuring a rapid and efficient response to emergencies.

VOLUNTEERING

Tech Core

siNUsoid

📅 2020 - 2023

I have worked as lead member in Tech team of NIIT university's TECH FEST

MediGuard - Smart Pill Box & Medication Management System

📅 2022   📍 Location

MediGuard is a revolutionary IoT-based project designed to enhance medication adherence and simplify the management of a patient's medication regimen. This innovative system comprises a smart pill box and a mobile application that work in harmony to provide timely reminders and notifications to patients, caregivers, and healthcare professionals, ensuring that medications are taken accurately and on schedule

OpTask - Daily Task Monitoring System (MERN Stack)

📅 2022   📍 Location

OpTask is a dynamic and versatile project based on the MERN (MongoDB, Express.js, React, Node.js) stack, designed to streamline daily task management through efficient CRUD (Create, Read, Update, Delete) operations. This web application provides users with a user-friendly interface to seamlessly create, track, update, and remove daily tasks, optimizing productivity and time management.
